

#### Define your problem statement

What problem are you trying to solve? Frame your problem as a How Might We statement. This will be the focus of your brainstorm.

**5** minutes

How might we able to come up with a better solution for sustainable farming using modern technologies?

How might we able to create a better environment for farmers?

**PROBLEM** How might we able to incorporate the modern technologies to have a better agriculture?

**PROBLEM** How might we able to make the life of farmers easier by have a great yields and good nutritional

#### Brainstorm

Write down any ideas that come to mind that address your problem statement.

① 10 minutes

# Person 1

content

## Person 2

PEISUIZ	
Pest notification	Multi cropping recommendations
Prior climate sensing	Soil type identification

## Person 3

Identification Crop tracking growth condition

## Person 4

Irrigation only on

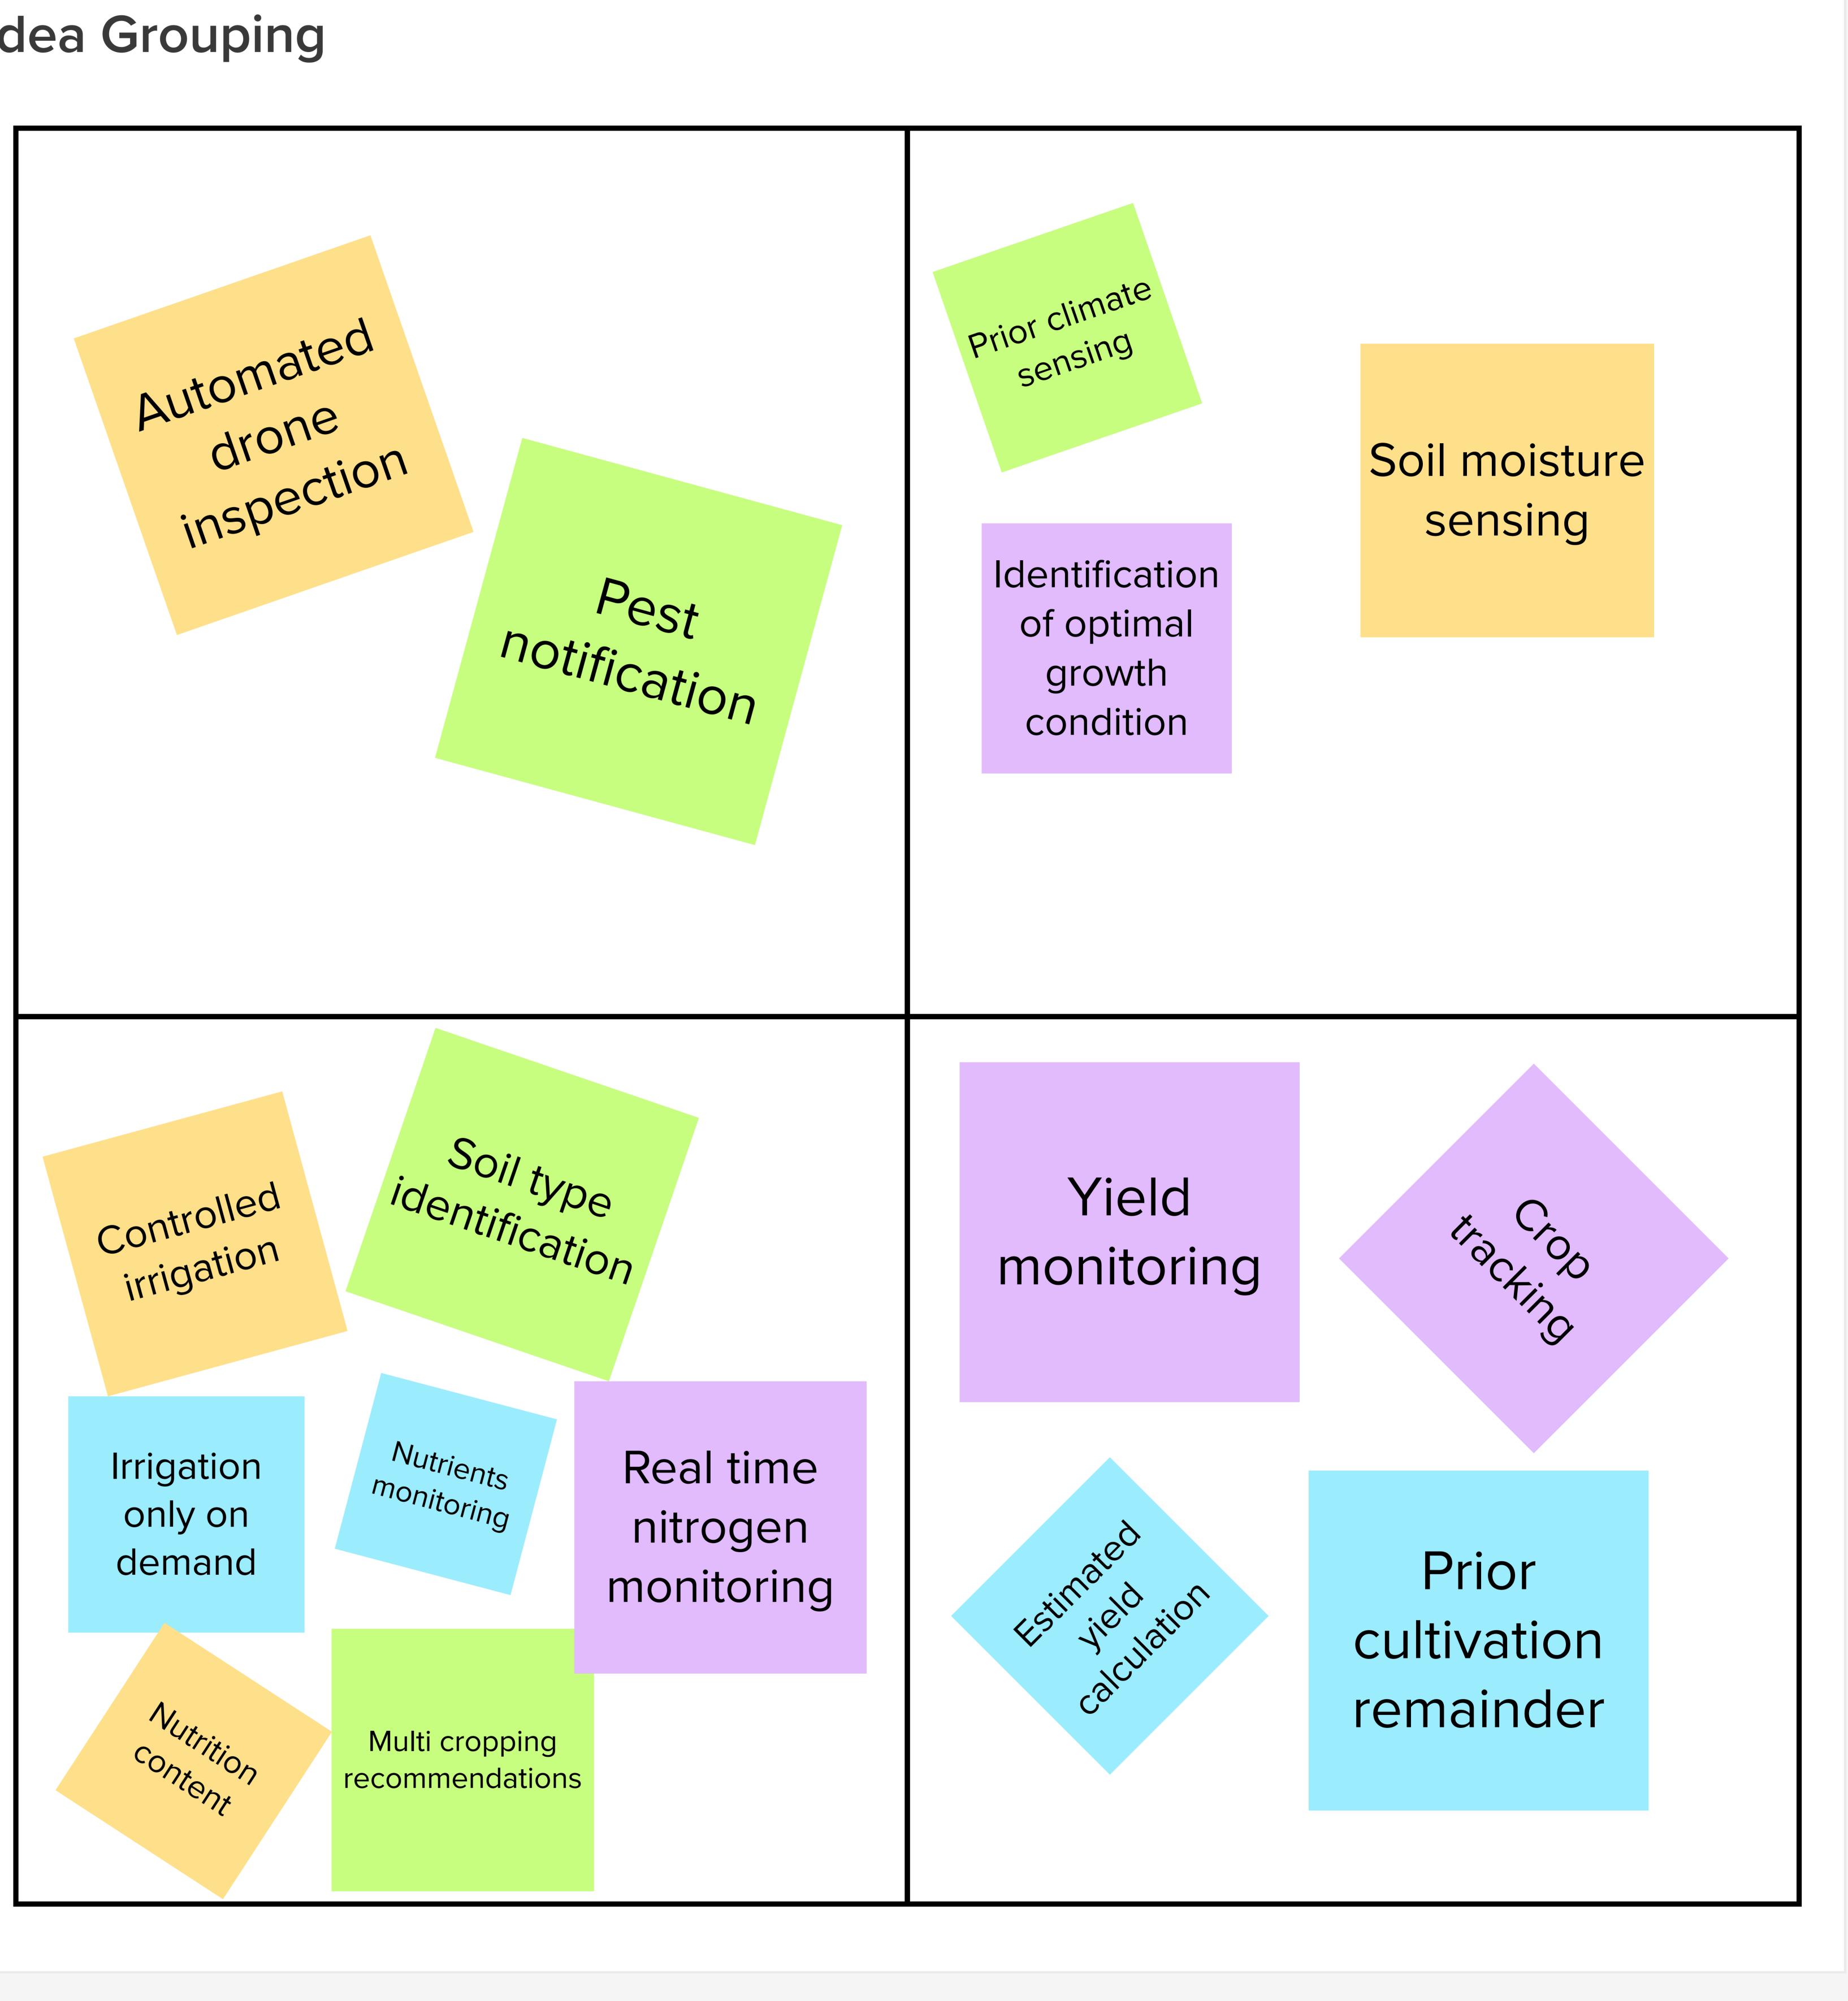

### Group ideas

Take turns sharing your ideas while clustering similar or related notes as you go. Once all sticky notes have been grouped, give each cluster a sentence-like label. If a cluster is bigger than six sticky notes, try and see if you and break it up into smaller sub-groups.

① 20 minutes

## Idea Grouping

#### Prioritize

Your team should all be on the same page about what's important moving forward. Place your ideas on this grid to determine which ideas are important and which are feasible.
